NanoQuantics to Exhibit at Eastern Coal Council Expo in Kingsport

Wise, Virginia (May 4, 2012) – NanoQuantics, an advanced materials company developing sustainable environmental solutions for the agriculture, mining and defense markets, will be exhibiting at the Annual Eastern Coal Council Expo, May 21 and 22 at the Meadowview Convention Center in Kingsport, TN.

“Our all-natural dust solutions fit perfectly with the needs of the coal industry,” said Tim Hopkins, VP and Chief Technology Officer at NanoQuantics. “We are working on products for dust control above and below ground which include applications in rail yards, haul roads, coal stock piles, berm areas, inside mine tunnels and for capping rail cars.”

Additionally, NanoQuantics is developing a bio-based soil amendment that accelerates seed germination and the overall growth of plants.

Hopkins stated, “Our Soil Sentinel product aids in hydro-seeding applications, such as re-vegetating reclaimed mine areas. The product is effective for soil stabilization and erosion control by reducing total solids run-off in environmentally sensitive areas.”

Established in 2010, NanoQuantics is located at the Americas Appalachian Energy Research Center in the Lonesome Pine Regional Business & Technology Park in Wise, VA. For more information on NanoQuantics, see website at www.nanoquantics.com.
